

Explanation:

- Bold is primary key, underline is foreign key.
- ParticipantTeams and TournamentTeam must exist due to there being a Many to Many relations.
- Team has a home location, where they are from.
- Admin can modify tournament information.
- Using varchar because it's basically a string in SQL except it's more efficient storage wise.

Coding Naming Standards:

- UpperCamelCase for class names
- lowerCamelCase for methods
- CONSTANTS_ARE_ALL_CAPS_WITH_UNDERLINES
- Local variables are lowercase.
- M in front of non-constant field names
